

Thieves in Seattle have a short busy summer while in San Francisco they enjoy a longer slow paced summer.

Theft is the largest crime in both cities. While in Seattle “THEFT” decreases over the summer of 2014, in San Francisco it increases gradually.

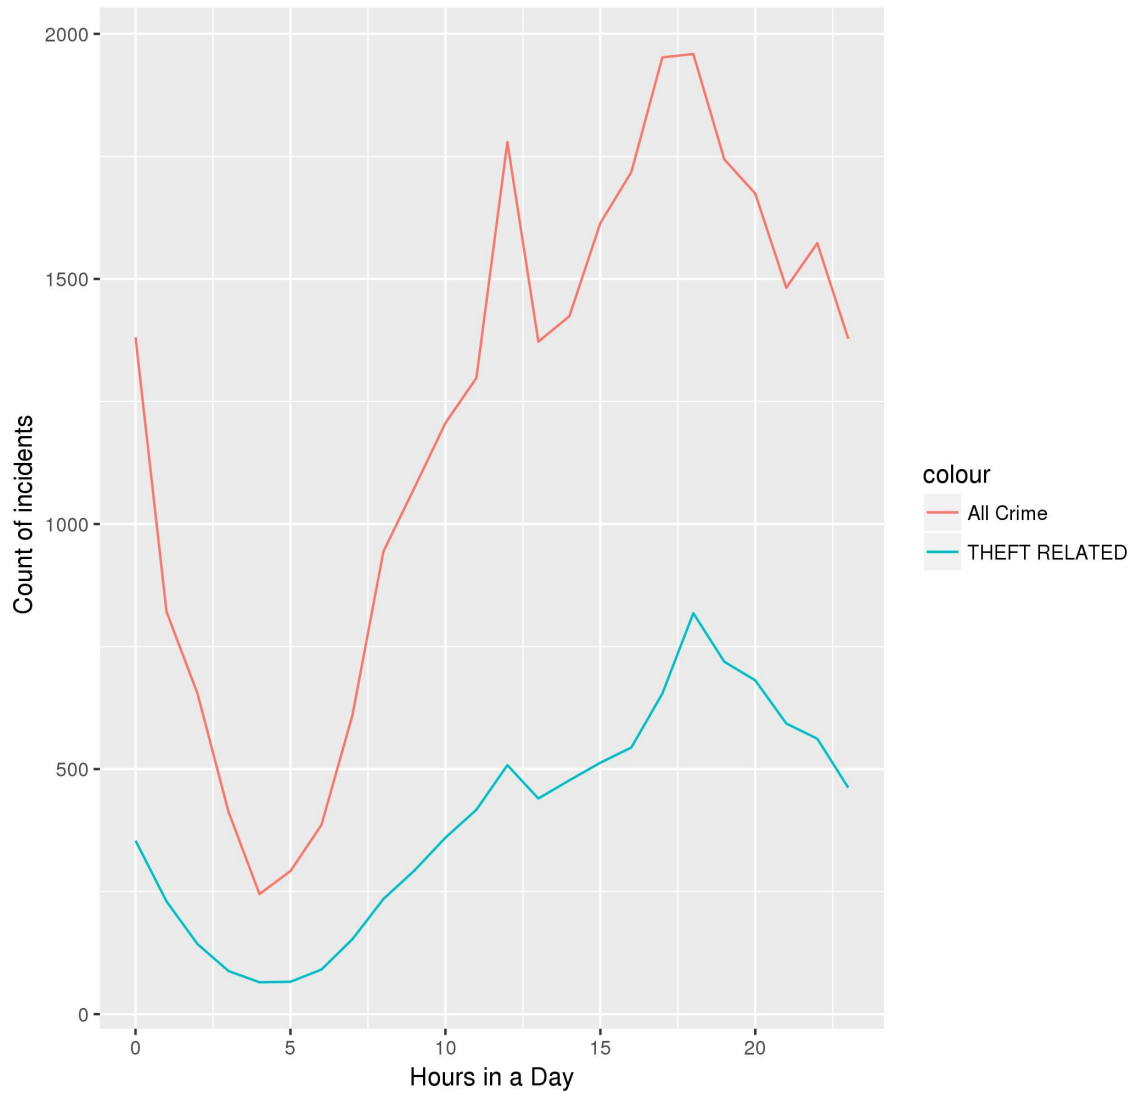

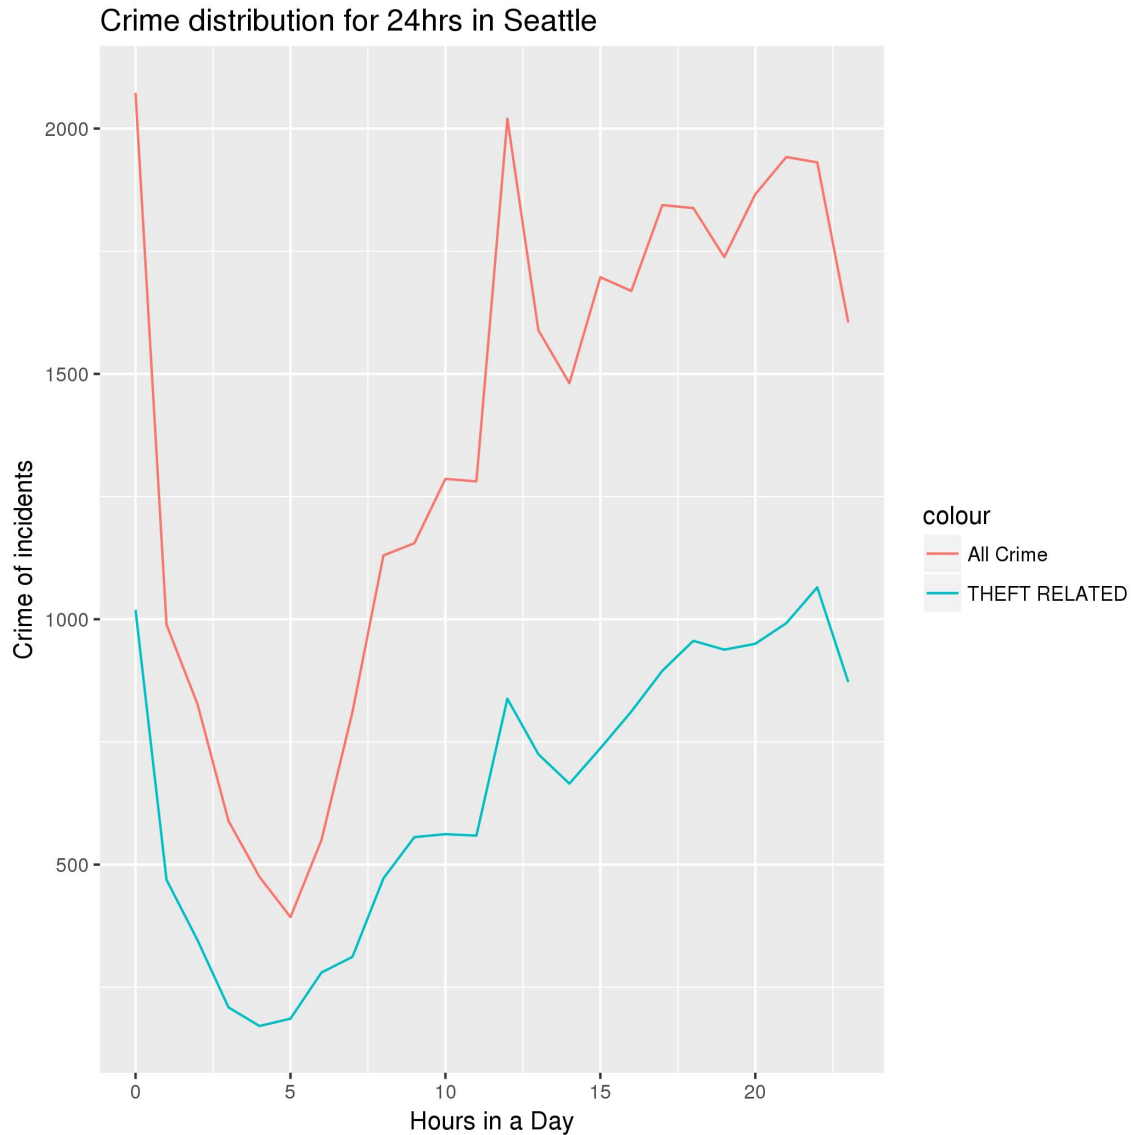

- ❖ **Comparing the 2 cities it is apparent that over the months of June, July and August, crime rate in Seattle decreases while in San Francisco it increases. Although the total count of thefts is higher in Seattle. Maybe due to the short summers in Seattle?**

- ❖ **Thieves in Seattle are also more nocturnal than in San Francisco.**
If you notice the below graphs, the highest theft occurs between 3PM-1AM. In San Francisco it's between 3PM-10PM

San Francisco Crime distribution in a day

Note:

- For the purpose of this comparison various 'THEFT' categories were clubbed into a single bucket. For eg : "PETTY THEFT OF PROPERTY", "GRAND THEFT FROM LOCKED AUTO" etc
- To improve visual comfort, granularity was changed to weeks or days when viewing progression over the Summer months
